

Also the 2nd and 3rd year Fellows from VCU all do 2 days a week seeing patients at Hunter Holmes VA Medical Center. All of the below fellows regularly order our tests for veterans including many for prostate cancer, I include their names and email addresses in case helpful to your patient:

VCU Oncology Fellows July 2020	Email address
Hank Ng, MD - 3rd year	Hank.Ng@vcuhealth.org
John McKay, MD - 3rd year	John.McKay@vcuhealth.org
Laura Hanson, MD - 2nd year	laura.hanson@vcuhealth.org
Sejal Kothadia, MD - 2nd year	sejal.kothadia@vcuhealth.org

You are very welcome, it was a pleasure for Sonja and I to be able to present for you gentlemen. Unfortunately our video did not record correctly so I am working on getting approval for a video we have internally made with a Prostate Cancer patient advocate to send over to you. In the mean time feel free to post a link to our YouTube page: <https://www.youtube.com/user/FoundationMedicine/featured>

However, if you have a **family history of cancers** like I(Peter Moon) do and PSA continues to go up or treatment fails , you should get a germline test to help you with treatment choices. I met Mr. Alan Sturke at Henrico Doctors' Sarah Cannon Cancer center off of Skipwith rd. when getting a blood draw as part of an NIH Genetic study my brother (Don) in Seattle Wa. enrolled the Moon Brothers in. Mr. Sturke is a geneticist who does germline testing for cancer doctors at that hospital and I recommend him as someone you can work with. His phone # is 804-545-7991: email = adam.sturke@hcahealthcare.com

I do not know any details about the need to have a Doctor request him to help you or coverage etc.

I learned from our Foundation ONE Zoom meeting that I can have both germline and somatic mutation of TMPRSS2-ERG Mutation.
