

Subject : PSMA "Pylarify" Update - Coming Soon! Next Steps...

Date : Tue, Jun 08, 2021 06:43 PM

Dear PSMA Priority List Members -

Since Lantheus received FDA approval recently for their PSMA PET Scan Agent, "Pylarify" , we have been working non-stop with their agents, employees, producers and distributors to bring PSMA to South Florida as soon as possible.

We expect to bring Pylarify to our facilities in a matter of weeks. As discussed on previous PSMA Priority List Updates, we do not yet know the exact number of doses they will produce per week, nor how frequently. However, we expect to begin by scanning approximately 5-10 patients per week.

In order to obtain your PSMA PET scan, here are the next steps you can take to be sure you are "ready to go" once you are contacted to schedule your scan:

1. A Valid prescription: In order to legally order radioactive doses, a valid script is needed. A valid script must have the patient name, date of order, date of birth, the test name ("PSMA PET SCAN"), a valid indication (e.g. "Prostate Cancer restaging", "Prostate cancer suspected biochemical recurrence", "Prostate Cancer Initial Staging, " etc.) and the signature of an authorized healthcare provider.

2. Appointments: Initially, PSMA doses will not be produced in South Florida, but they -can- and -will- be flown in and calibrated specifically for your time and appointment. Therefore, we may ask you to arrive a bit earlier than usual for your appointment (as doses may arrive early which could allow us to begin your scan before your scheduled time). Also, flight delays may slightly delay your scan start time. We ask for your understanding in this regard, and as always, we will do everything in our power to deliver what we promise.

3. A Billing and payment: Insurance companies have not yet established reimbursement codes for Pylarify. Therefore, our policy (as with other new PET scan agents) is to charge our usual \$1000 PET scan cash price in addition to - our direct cost- of Pylarify (we do not up-charge). PET Imaging Institute must pay in full for each dose before it is flown in and available to you. Given these factors, we will request payment prior to your scheduled appointment.

Finally, a brief word about our PSMA Priority List and determining the order in which patients will be scanned. Based upon the number of expected weekly available doses, patients will be contacted to be scheduled: (a) In the order in which they joined the PSMA Priority List, (b) based upon patient's availability for

pre-determined scheduled time slots and dates, (c) willingness to self-prepay according to #3 above and (d) fulfillment of #1 above.

If you are local to our facilities and are interested in joining our "PSMA Standby List" to potentially fill-in a last minute available PSMA appointment, please email us at: psma@piisf.com and you will be contacted directly with details.

We are very excited to soon begin scheduling!

As always, if you choose to have your PSMA PET Scan with PET Imaging Institute, begin gathering the information as outlined above.

Thank you all once again for your interest in PSMA PET Scans for Prostate Cancer. If you have any questions, please let us know.

Regards,

Barry L. Charnick, MD

Medical Director, PET Imaging Institute of South Florida - Ft. Lauderdale
