

HONOKIOL

[Some Integrative Oncologists refer to Honokiol as a Natural Chemo]

AR signaling is implicated in the transition of Pca from an Hormone-Sensitive State to a Castrate-Resistant State.[Sometimes referred to as Androgen-Independent]. So it is important to have novel drugs or supplements for inhibition of AR activity. We know today that over a period of 8 years of different studies that Honokiol inhibits the growth of human Pca Cells by causing cell cycle arrest and apoptosis regardless of Androgen Responses or those tumors containing the P53 Gene Mutation. [Why mention P53--->many Mutant P53 Proteins acquire Oncogenic Properties that enable them to promote invasion, metastasis, proliferation and cancer cell survival. Honokiol Treatment decreases the protein level of AR in both Androgen-Sensitive and Androgen-Independent Pca cells. The Honokiol Downregulation of the AR protein is due to down right Degradation, as well as a reduction in the AR messages. [Many you know of my zeal to control protein messages especially from mRNA when being PSA Undetectable]

In going to Castrate Resistance the AR Translocates to the Cytoplasm of the cancer Cell. ***This Transcriptional Stimulated Nuclear Translocation of the AR again to the cytoplasm is highly suppressed greatly in the presence of Honokiol. Honokiol Treatment causes a significant decrease in expression as well as secretion of AR regulated PSA, and Honokiol is able to inhibit LNCaP Cell Growth. For those that do not know LNCaP Cell lines are very sensitive to Androgens.

While ADT has certain SE's one that many on ADT worry about is Osteoporosis. As an aside Honokiol has shown to promote Bone Stability, by inhibiting RANKL

signaling. You all can look up RANKL signaling. I am not suggesting you give up ADT and substitute Honokiol, but some of us use them together.

Honokiol crosses the Blood Brain Barrier, and is currently under investigation for certain Brain cancers. I have not discussed Honokiol which comes from the Magnolia Bark before, though I have known of its anti-cancer activities and have used this Agent for 4 years---3 times a day.

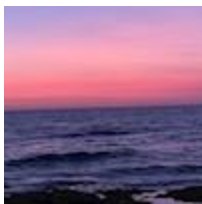

There is no need to ask me what I use--I can say there are many products out there--but anyone interested in exploring its use should only use those products that are 98% Pure Honokiol. Most products are just extracts of the Magnolia Bark, which contains Honokiol. The purified fractionated Pure Honokiol is what has been used in Pca research as well as other cancer research.

many thanks...

[GreenStreet](#) 23 hours ago

Nal many thanks for this .I will investigate further.

[CrocodileShoes](#) 22 hours ago

Hi Nal, I've been taking Honokiol for about a year. But I'm not sure what would be an appropriate dosage. Do you have any thoughts (yes, I know, you're not prescribing anything!)

[Ralph1966](#) in reply to [CrocodileShoes](#) 22 hours ago

Hi, which brand you are using?

[Ramp7](#) in reply to [Ralph1966](#) 19 hours ago

A lotta choices....

[D Alden](#) in reply to [Ralph1966](#) 18 hours ago

I use Honopure brand they claim it is pure Honokiol. Some brands have a blend of

Magnolol & Honokiol, % that is Honokiol is often not stated.

[Spyder54](#) 22 hours ago

Thanks Nal. That is a very harsh caveat, on the cross of the Blood Brain Barrier. Sometimes I think, no risk, no return. Mike

[Lulu700](#) 15 hours ago

Aha! Per Dr Uzick my naturalpathic oncologist I've taken ecoNutrients Hono Pure over six years . No stopping now ! Thanks Nal .

[Fanger1](#) in reply to [Lulu700](#) 12 hours ago

God Bless Mother Nature 🙌

[TFBUNDY](#) 11 hours ago

Hi Nal. Enjoy your break bothering the fish population. Honokiol looks great except for bioavailability. There are a few research papers on mitochondria targeted honokiol which look very good. Do you know if there is anything available or know how to make it? Have fun and stay well

[Fiddler20041](#) 1 hour ago

Thanks for the info... I'm taking a CYP450 inducer (prednisone) so I have to do more research and ask Oncologist if Honokiol would be safe
