September is #ProstateCancerAwarenessMonth. If in the Chicagoland area, please join us for the 14th Annual SEA Blue Prostate Cancer Walk/Run on Sunday, September 9th in LincolnPark, Chicago. The event will help raise funds and awareness for prostate cancer Support, Education, and Advocacy. For more information, to register, or to donate, visit www.seablueprostatewalk.org.

September is #ProstateCancerAwarenessMonth. Prostate Cancer Pathways for Patients and Caregivers is a free educational event and webcast series from Us TOO International Prostate Cancer Education & Support Network. Please join us for our next Pathways event via live webcast with audio and video or in person on Saturday, September 29, at Englewood Hospital in Englewood, NJ. Topics will include: #prostatecancer, diagnosis, treatment options, men’s health, and a special presentation on sex and intimacy related to prostate cancer. Free lunch will be provided to pre-registered in-person attendees. To register to attend the event, visit: www.mainstreamchicago.com/ustoo-pathways-new-jersey or contact Terri at 877-978-7866 or terril@ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know prostatecancer is the most common non-skin, male-specific cancer in the U.S., affecting one in nine men? Learn more at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know approximately 165,000 men will be diagnosed with prostatecancer in 2018? Learn more at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know some men are at a higher risk for developing prostatecancer? African American men have the highest incidence of prostate cancer; they are 60 percent more likely to develop the disease and more than twice as likely to die from it compared to Caucasian men. Men with a family history of prostate cancer are at higher risk for developing prostate cancer. Learn more at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know men who served in the military during the #Vietnam and #Korean wars who were exposed to #AgentOrange are at a higher risk for developing prostatecancer (and other cancers/diseases)? Learn more at http://www.ustoo.org/Military-Veterans.

September is #ProstateCancerAwarenessMonth. Did you know more than 29,000 men will die this year from prostatecancer (81 men every day) and that prostate cancer is the second largest cancer killer of men following lung cancer? If detected early, prostate cancer is often treatable. Learn more at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know prostate cancer has no symptoms until it’s advanced? Screening for prostatecancer includes a PSA (prostate specific antigen) blood test and a DRE (digital rectal exam) and a biopsy is required to diagnose prostate cancer. Learn more at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know nearly three million men in the U.S. are living with a prostatecancer diagnosis? That number is estimated to climb to four million by 2024 as men in the baby boomer generation age. Learn more at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know that rather than any “quick fix” for prostatecancer, there are many treatment options and related side effects that each patient needs to evaluate to ensure informed decision making? It’s not necessary or advisable to make a hasty decision. Learn more at www.ustoo.org.
September is #ProstateCancerAwarenessMonth. #Prostatecancer can be a couple’s disease. A woman may be struggling with her own concerns in addition to those she shares with her partner. Learn more and access support services for female caregivers at http://www.ustoo.org/aforumforher.

September is #ProstateCancerAwarenessMonth. Check out video from the Prostate Cancer Pathways for Patients and Caregivers event recorded recently in Seattle, featuring a special presentation on #genetictesting related to #prostatecancer. Visit www.ustoo.org/Pathways-Seattle-Webcast.

September is #ProstateCancerAwarenessMonth. Empower yourself with knowledge on #prostatecancer testing, treatment, and management of side effects. Learn more and get support at www.ustoo.org.

September is #ProstateCancerAwarenessMonth. Did you know many couples are unprepared to face sexual issues, like #erectiledysfunction (#ED) and urinary #incontinence that can occur in the wake of #prostatecancer treatment? This can put an added burden on top of the already exhaustive task of tackling prostate cancer, and possibly lead to anxiety and depression for the patient and his partner. Learn more and get support at http://www.ustoo.org/intimacy.

September is #ProstateCancerAwarenessMonth. Did you know radical prostatectomy (removal of the prostate gland and lymph nodes) or radiation can have a side effect of urine leakage (incontinence)? Learn more at http://www.ustoo.org/incontinence.

September is #ProstateCancerAwarenessMonth. Did you know #clinicaltrials are scientific studies to determine how new medicines or treatments work in people? Through clinical trials, doctors find new and better ways to prevent, detect, diagnose, control, and treat illnesses, such as #prostatecancer. Search a free clinical trial finder at http://www.ustoo.org/HCP-Clinical-Trials.

September is #ProstateCancerAwarenessMonth. Did you know #prostatecancer is a disease that is not necessarily exclusive to older men? Younger men with a family history of #prostatecancer, #AfricanAmerican men, and military veterans who have been exposed to chemical agents might consider starting testing at a younger age. Talk to your doctor and visit www.ustoo.org for more info.
